

Dear Friends,

We don't know if we should be worrying about you very much - or not! We think all's well with you as Ivan Morrison wrote that 16 years had disappeared when Nemesis became the director of the museum just as he had been before the Golpes. So he is well? And Patricia has had her show?

Meanwhile did you receive my proof with color corrections? I had left some paper at Taller 99 so that he could send me ~~over~~ final proofs. I do hope Suñer is going forward as various people here are standing about waiting to buy their copies.

We had a grand time in Berlin  
The dealer + his wife made it all  
good and helped us to take off  
for a week in Poland and Czechoslovakia.  
East Berlin seemed desperate but Poland  
was beyond the believable. For a  
month it occupied my dreams. Then  
came a few weeks of pneumonia.

Ann + George Hogle ~~write~~ speak  
of you both very often. They think  
that they wrote to you but don't  
know if they really did or was it  
just the desire to write.

Please write a few words. If  
you don't we will drop by.  
Much love from Meme and

Paul
